On July 8th 2021, Facepunch Studios announced that "Rust" would be rebuilt with the use of a new development engine in order to create next-generation visuals and longer-term gameplay improvements.",

Game worlds which offer mods generally have moderators who will not allow you to hack your game, especially when you cheat in-game using cheats. So make sure that you follow the rules of the mods and if some mods don't have any rules, then it is really better to play on other vanilla Minecraft servers for staying out of trouble with moderators. Cheating in Minecraft means breaking your own game rules and violating the server's policy about cheating. There are many different types of multiplayer games that you can play on Minecraft. Some types of servers are: Survival Servers: In Survival Servers, you have to survive on the land for as long as possible without the knowledge of other players in the world. There are things called "npc" which stands for Non Playable Characters. These characters give out challenges and objectives that will give you rewards and help progress you through the game, but there is one huge catch... You are visible to other players if you make a noise or break certain blocks. If you are the first person at the location upon joining then it will be yours. If another player sees that first person breaking fences and trees and decides they want to claim ownership, they can kill them and then take ownership of that location. In a Survival Server, you will be given an item called "Permission Node" which allows you to see where other players are on the server. These items are very rare and can only be obtained by doing some specific tasks in game such as going through long distances or through many different biomes, etc. Creative Servers: In Creative Servers, players can build anything they want with real-world objects inside the game. There aren't any rules, so you can build anything that your imagination can think of. You can build houses, villages, and even dungeons for people to explore; and if you ever get bored of your creation you can destroy it and start over! Mini Game Servers: These servers are focused on playing mini games in order to win rewards. In a mini game server, there will usually be an objective that the players have to reach in order to win a prize. There are many different types of mini games: Sky Block Servers: Players have to survive on floating islands.",

Players can build anything they want with real-world objects inside the game. You can build a castle, a spaceship, or even an entire city. And although you have a very limited space to build in the game, thatâ€™s not necessarily true of the game itself. Many players find that there are never enough resources to fit their plans for how they want to play Minecraft. While this can be great fun for creative or artistic players, it can be frustrating for others who just want more materials and better crafting recipes for building more things.",
